PERSONAL PROFILE

Product leader with 11 years' experience building and scaling data-heavy products across SaaS, fintech, lending, healthtech and social care. At Helium Health, led Payments, Lending and Data squads, shipping platforms used by millions, processing \$50M+ in payments and \$11M in credit while keeping defaults low. Now leading a care management platform for Relate at Family Action, embedding safeguarding, GDPR, consent, notes, supervision, payments and audit workflows. Strengths span discovery, roadmaps, prioritisation, PRDs, OKRs and releases, plus Databricks and SQL data modelling, instrumentation, KPI design, dashboards, reconciliation and data quality. Previously built an AWS Databricks lakehouse that strengthened internal data quality and delivered trusted reporting for Finance, Operations and Client Services, as well as NHS, Police and other public sector clients.

PROFESSIONAL EXPERIENCE

Software Product Manager

Family Action, London, UK | Sep 2025 – Present

- Leading delivery of a new care management platform for Relate services across intake, scheduling, consent, clinical notes, supervision, payments and vouchers, with a 20% reduction in admin time per case set as the primary success measure.
- Completed discovery with clinicians, operations, contracts and data, mapping current workflows and risks, and translating safeguarding, privacy and audit requirements into clear workflow controls and acceptance criteria.
- Defined the delivery plan and backlog, writing epics, user stories and acceptance criteria to standardise day to day practice, including role based access, approvals and validation rules to keep records accurate and audit ready.
- Delivery has now kicked off, with the MVP for intake and scheduling built and moving into pilot with frontline users, supported by short training sessions and structured feedback.
- Owning prioritisation across new build, fixes and operational support, making trade offs based on service outcomes, user feedback, incident patterns and delivery impact.
- Partnering with engineering to deliver reliable releases and stable rollouts, with early success measures to lift intake and notes completion from 60% to 80% and reduce repeat incidents by 30%.

Data Product Owner

Dals (formerly DA Languages), Manchester, UK | Nov 2024 – Aug 2025

- Led delivery of a new data platform on Databricks (AWS), consolidating data from four interpreting systems into a single lakehouse.
- Implemented data quality controls, including validation, reconciliation, and alerting to protect contractual MI.
- Aligned Operations, Finance, and Account Management through discovery playbacks, roadmaps, and regular updates.
- Improved cost and performance through partitioning, incremental loads, and tuned Databricks workloads.
- Owned KPI definitions and a governed metrics layer so dashboards and exec packs used the same trusted numbers.
- Delivered accurate reporting in Power BI and Tableau for NHS, Police, and other public sector clients, as well as internal planning and forecasting.

Senior Product Manager

Helium Health, EMEA | Mar 2021 – Nov 2024

- Led the COVID-19 test-booking platform serving over 15 million monthly traveller journeys, enhancing user flow and reducing booking friction by 25%.
- Launched a credit platform processing \$11M in loans to healthcare providers, securing a 3.2% default rate and contributing to a \$30M Series B funding.
- Delivered a payment product handling over \$50M+ TPV annually, automating reconciliation to cut cycle time by 70%.
- Built real-time analytics dashboards for credit and payment products, providing live insights into loan performance and transaction flows, reducing issue resolution time by 50% and driving a 20% boost in feature adoption.
- Strengthened compliance and operational controls by tuning KYC/KYB/AML triggers with Risk and Engineering, reducing manual casework and improving audit readiness through clearer audit trails and access controls.

Senior Product Owner (Contract)

Apadmi Limited, Manchester, UK | Mar 2024 – Jun 2024

- Led product changes to the Co op mobile membership app, improving UX and performance, which increased the app store rating by 1 point and reduced support queries by 25%.

Product Lead

LoftyInc Allied Partners Limited, Lagos | Dec 2018 – Mar 2021

- Integrated a multi-gateway payments platform, lowering transaction failure rates from 23% to 3% and halving processing time.
- Built scalable enrollment and payout systems for 14,000+ users, increasing engagement by 30%.

Product Manager

Vantium Limited, Lagos | May 2014 – Nov 2018

- Launched an edtech platform supporting 1.3M learners, improving retention by 20%.
- Designed low bandwidth content strategies and product features that supported users in regions with limited connectivity, reducing churn and support tickets.
